MOBILE SOLUTIONS

ACCESS CONTROL

HALSANG MOBILE SOLUTIONS

**Mobile solutions for building sites, events,
temporary solutions etc.**

ADVANTAGES

TOTAL SOLUTION

Halsang offers a total solution for building site access control and mobile fencing. With a wide product range, high quality products all developed for Nordic climate we ensure a reliable temporary installation.

MOBILITY

All products are prepared for easy transport and guarantees a good stability on site after the installation.

EXPERIANCE

Halsang has a long experience in developing mobile access control solutions and we are constantly improving our products in order to meet the customers requests.

HIGH QUALITY

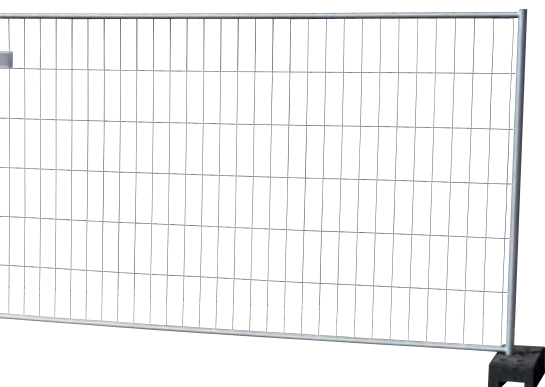

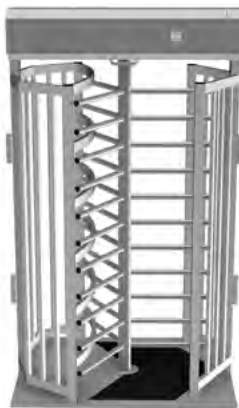

Our high quality products offers long life time, resulting in a financially good investment for the customer.

TECHNICAL SUPPORT

Halsang offers an on-line technical support on all our products.

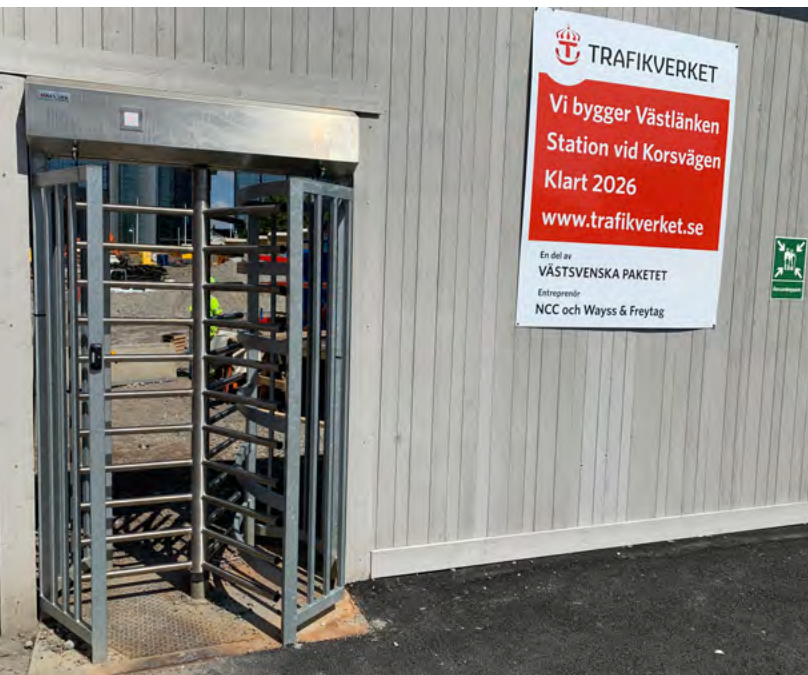

ID06

In accordance with En 13241

MOBILE FENCE

QUALITY

- The panels are available in widths 3.5 m or 2.2 m.
- Heights: 2 m and 1.1 m
- Hot galvanized execution after welding.
- Hand-welded mobile panels with 360 degree welding.
- "Tube-in-Tube welding". All horizontal pipe profiles are fully welded into the vertical tubes, which provides high stability and extremely strong corners.

Halsang mobile fences have a significantly longer lifetime compared to traditional mobile fences made in pre-galvanized execution, which leads to a significantly better overall economy. Halsang mobile fence panels eliminate the problem with loose/breaking weldings.

TURNSTILES

FAST AND SAFE

The turnstiles are designed for continuous operation and can be successfully used in areas with high frequency passages. Suitable areas: temporary solutions e.g. constructions sites, events etc. The turnstile has a rotating spindle with 3 (120 degree) or 4 arms (90 degree), depending on requested security level.

- Prepared for external card reader
- Stainless steel spindle and cabinet as standard
- Cage in HDG as standard
- 15-20 passages/min
- Mounted on steelplate 120x1500 mm

SWING GATES

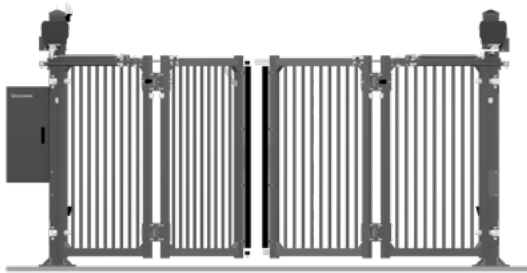

COMPLETELY PRE-ASSEMBLED

Professional motorized swing gate for industrial and mobile solutions. Designed for high frequency usage.

The motorized swing gates are fully pre-assembled when delivered, allowing for easy and quick installation on site (plug and play). For manual design, the gates are prepared for padlock and is delivered with ground pin on each gate wing.

- Opening width 5 m
- Height 2.0 m + 3 rows of barbed wire
- TÜV approved and in accordance with EN 13241-1

SPEED FOLDING GATES

SMART DESIGN

Valhalla speed folding gate is an optimal solution for high frequency usage of the entrance.

The design is very solid and in accordance with EN 13241.

Lubricated ball bearing hinges ensure a durable and safe operation.

When the gate is fully opened, the gate wings are positioned in line with the post and are protected from damage by passing vehicles. As a result, the passage width is optimised.

The powerful gate motor with stainless steel and powder coated cover is installed at the top of each post. The intelligent controller (H102) offers numerous programming options, as well as additional access control options.

SLIDING GATES

MOBILITY

Halsang bi-directional mobile sliding gate 6x2 m for construction sites etc. Available in aluminum and HDG versions.

The gates are installed on a strong and reinforced concrete foundation, prepared for being handled by forklifts. Each concrete foundation is integrated on a sturdy steel plate which provides good stability and durability. The gate posts are equipped with fence connection for mobile fences.

The end post is also installed on a stable concrete foundation with the same possibilities for handling by forklift. During transport or during movement on the construction site, the gate wing is locked/secured by a strong square profile preventing the gate wing from moving. The gate posts are equipped with a fence connection for mobile fence, both on the guiding post and the end post.

"TUBE-IN-TUBE WELDING" AND HOT DIP GALVANIZED

LOGISTICS

A number of different transport pallets for optimal, fast and safe handling.

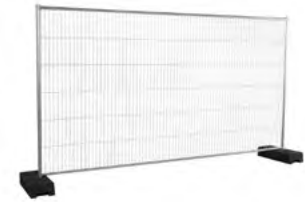

MOBILE FENCING

2,2 x 2,0 m
